## PREFACE.

THE claim is made for this book of foreign exchange conversion tables that it is the only complete set of such tables in print. Each line is a table in itself for the rate given in the margin; and there is a table for every rate ever quoted on every country for which it is practicable to make conversion tables. There are tables extant for English money, others for French, and others for German money; and there are yet others pretending to be complete for all countries but which contain only those rates most commonly used omitting a very large number which are much used and which are really the most important because they are the hardest to figure. This book contains them all. The tables for English money include all rates, both those expressed to the fractional part of a cent, and those expressed to the decimal of a cent, and they run from \$4.75 to \$5.00 per pound, a wider range than any other set of tables. The tables for French, German and Dutch monies are as complete, including all the rates ever used from the lowest to the highest point. Austrian tables include rates to the one fourth hundredth of a cent. Scandinavian tables are to the one half hundredth of a cent. In other words, this book contains all that all other books of foreign exchange tables combined contain, and much besides, and for the price of any one of them, and cheaper than most of them.

There are some countries for which conversion tables might be made but which would be so little used that it would not be desirable to burden the pages of a book with them. In the case of China, there are no tables for taels above 52½ cents. Tables for Indian rupees or Portuguese milrês would be voluminous and little used. On South and Central American countries, drafts are commonly written in either United States or English money, and tables for rates not here given would only serve the useless purpose of filling up space.

There are other tables besides conversion tables given in this book which ought alone to be worth its price. These are the various profit tables for checks and drafts sold over the counter, and interest and other tables in the back of the book for figuring the value of bills of exchange. Then, too, the tables convert instantly any rate expressed decimally into one as commonly quoted by bankers. And their relation one to another make them available for figuring arbitrages by a short method.

There has been no attempt to make of this book anything like a text-book or treatise in general on the subject of foreign exchange. That is an educational branch of the subject requiring a volume in itself and by itself; it cannot properly be handled outside of a work of at least one hundred and fifty or two hundred pages. There are several excellent books of the kind now extant. Besides, when it comes to such matters as bills of exchange, and kindred paper, finance bills, cable transfers, letters of credit, traveler's checks, etc., there are so many laws, requirements, customs and forms governing them, that no one can learn how to properly handle them except in the school of experience. Such paper does not come into the market much except in cities where there are firms doing more or less of an export or foreign business, and instructions in the matter are beyond the scope of what this book of conversion tables was intended.

# ENGLISH MONEY.

## How to convert United States money into English money, and vice versa.

To convert dollars and cents into pounds, shillings and pence, divide the number of dollars by the rate. When the pounds are obtained, multiply the remainder by 20, and continue the division till the shillings are obtained; then multiply the remainder again by 12, and continue till the pence are obtained. See example below, at the left.

To convert pounds, shillings and pence into dollars and cents, multiply the pounds, and the shillings as a decimal, by the rate (or sometimes, for convenience, the rate by the pounds and decimal), and add two cents for every penny. See below, at the right. To get the decimal for the shillings, divide by 2; remember, for instance, that 19 shillings equals nineteen twentieths of a pound, or nine and one half tenths, which is, expressed decimally .95 In other words, £27-19s = £27.95

**Example.**—How many pounds, shillings and pence are there in \$136.25 at 4.87½? and, vice versa, how many dollars and cents are there in £27-19s-5d, at the same rate?

	4 87125   136 25000   27 19 5.		4.87125
	97 4250	£27.95	27 95
	38 82500		2435625
	34 09875		4384125
	4 72625		3409875
20s	20		974250
	9452500		1361514375
	487125	2 × 5d	10
	4581250		£136.25
	4384125		
	197125		
12d	12		
	394250		
	197125		
	2365500		
	2435625		

In the above example in long division, instead of multiplying by 20 and by 12, the result may be carried out into a decimal, and the value of the decimal, in shillings and pence, will be found at the bottoms of any of the left hand pages, from 8 to 44.

## How to write checks and drafts.

Drafts drawn in English money should be written out in full as illustrated at the heads of pages 8 to 44, and on a single line if possible. Checks in England are commonly written with a shilling sign, /, thus: £2/5, meaning twelve shillings and five pence; but the form is not much recommended by New York bankers and exchange jobbers for foreign drafts. If plainly written, however, there can be no objection to it; it is the proper form.

In Great Britain and foreign countries, strict attention of the payee is required, as in the United States, and there is no recourse back on a forged endorsement. It may be "crossed," by writing two parallel lines across the face and "pay to the order of" or "pay to the order of" in the words require that the check through some other and not paid in cash amounts, in some of the payee's iden

Ireland, as in most personal identification not usually required in the States, and there is the paying bank for Checks and drafts however, by draw across their face and "& Co." This will or draft be collected than the paying bank, over the counter, and degree to a guaranty tity.

5

Commercial drafts (Bills of Exchange) payable in Great Britain and Ireland are subject to a stamp tax as follows, if drawn for more than three days sight:

Up to £5, . . . . .	1d.
Above 5, . . . . .	2d.
" 10, . . . . .	3d.
" 25, . . . . .	6d.
" 50, . . . . .	9d.
" 75, . . . . .	1s.
" 100, 1s for every £100 or fractional part thereof.	

English Money

Sight drafts are allowed 3 days of grace.

Bank of England notes are printed in denominations of 5, 10, 20, 50, 100, 200, 500 and 1000 pounds. Gold is coined in sovereigns and half-sovereigns (pounds and half-pounds). Silver is coined in crowns, (5s), half-crowns, (2½ s), florins, (2s), shillings, six-pence and three-pence. Copper coins are the penny and half-penny. Like all other countries, Great Britain has several coins of special issue entering only partially into the general circulation. These consist principally of 2 and 5 pound gold pieces, 1, 2 and 4 penny silver pieces, and the farthing.

English gold is 916<sup>2</sup>/<sub>3</sub> parts fine and 83<sup>1</sup>/<sub>3</sub> parts alloy, and is worth \$4.866<sup>1</sup>/<sub>2</sub> at the United States mint, which is, in other words, its par value. English silver is 925 parts fine and 75 parts alloy; its nominal value is of course one twentieth of a pound, or about 24<sup>1</sup>/<sub>3</sub> cents per shilling.

The market value of English paper money in New York (New York purchasing rates) fluctuates from about 1 or 2 cents above par to 3 or 4 cents below par, per pound. Gold fluctuates from about par to 2 or 3 cents below. And silver ranges from about \$1.80 to \$1.84 per pound, that is, about 24 cents per shilling.

The New York selling rates are from 2 to 5 cents above purchasing rates. Quotations may always be obtained from Eastern bankers and jobbers, and some publish them periodically.

## Profit Table for English Money, By $\frac{1}{8}$ , $\frac{1}{4}$ , Etc.

Example.—A customer wants a draft worth \$600.00; the quoted cost rate is 4.87½; the profit desired is \$1.50. At the right of the figures 600, it will be seen that an advance in the rate of 1¼ will yield a profit of \$1.54; therefore quote 4.88¾ (4.87½ + 1¼). For amounts not given here, take a fractional part, like one half, or a multiple of some other number.

## Profit Table for English Money, By .05, .10, Etc.

**Example.**— A customer wants a draft worth \$3500; the quoted cost rate is 4.8620; the profit desired is \$3.00. At the right of the figures 3500, it will be seen that an advance in the rate of .15 will yield a profit of \$3.23; therefore quote 4.8665 (4.8620 + .15). For amounts not given here, take a fractional part, like one half, or a multiple of some other number.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{8}$  in the rate amounts to about 26.3 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

The table above reduces dollars and cents to pounds and decimals of pounds. The table below reduces the decimals of pounds to shillings and pence; which last will be found at the top and sides. In adding two or more numbers together, use three or four decimals, according to the degree of accuracy required.

The table above reduces **pounds** to dollars and cents. The table below reduces **shillings and pence** to dollars and cents. For rates near the top and near the bottom of the page, some of the figures in the table below may be in error from .01 to .15 of a cent. The cents vary in value by that amount.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 26.2 cents on \$1,000. Write amounts as follows, giving preference to first form:

Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

The table above reduces dollars and cents to pounds and **decimals of pounds**. The table below reduces the decimals of pounds to shillings and pence; which last will be found at the top and sides. In adding two or more numbers together, use three or four decimals, according to the degree of accuracy required.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{8}$  in the rate amounts to about 26.2 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

The table above reduces dollars and cents to pounds and decimals of pounds. The table below reduces the decimals of pounds to shillings and pence; which last will be found at the top and side. In adding two or more numbers together, use three or four decimals, according to the degree of accuracy required.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.      1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of 1/2 in the rate amounts to about 26.1 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds, <sup>12</sup>/<sub>5</sub> Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.      1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{8}$  in the rate amounts to about 26.1 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 26 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{2}$  in the rate amounts to about 20 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes preferable to use *Stg.* for *Sterling*, but the latter word is always best.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 25.9 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{3}{8}$  in the rate amounts to about 25.9 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

Pounds to Dollars

4.83

The table above reduces **pounds** to dollars and cents. The table below reduces **shillings and pence** to dollars and cents. For rates near the top and near the bottom of the page, some of the figures in the table below will be in error from .01 to .49 of a cent. The cents vary in value by that amount.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 25.8 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Ny.* for *Sterling*, but the full word is always best.

The table above reduces **pounds** to dollars and cents. The table below reduces **shillings and pence** to dollars and cents. For rates near the top and near the bottom of the page, some of the figures in the table below may be in error from .01 to .49 of a cent. The cents vary in value by that amount.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 25.8 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds, <sup>12</sup>/<sub>5</sub> Sterling.

It is some-times permissible to use *Stg.* for *Sterling*, but the full word is always best.

# 30 English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{8}$  in the rate amounts to about 25.7 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{8}$  in the rate amounts to about 25.7 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

# 34 English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings;

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 25.6 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{s}$  Sterling.

It is sometimes permissible to use *Sh.* for *Sterling*, but the full word is always best.

The table above reduces dollars and cents to pounds and decimals of pounds. The table below reduces the decimals of pounds to shillings and pence; which last will be found at the top and side. In adding two or more numbers together, use three or four decimals, according to the degree of accuracy required.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 25.6 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 25.5 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 25.5 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

The table above reduces **pounds** to dollars and cents. The table below reduces **shillings and pence** to dollars and cents. For rates near the top and near the bottom of the page, some of the figures in the table below may be in error from .01 to .49 of a cent. The cents vary in value by that amount.

# English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings.

1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 25.4 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{5}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

The table above reduces dollars and cents to pounds and decimals of pounds. The table below reduces the decimals of pounds to shillings and pence; which last will be found at the top and side. In adding two or more numbers together, use three or four decimals, according to the degree of accuracy required.

# 44 English Money. Dollars and Cents to Pounds, Shillings and Pence.

1 Pound = 20 Shillings. 1 Shilling = 12 Pence.

Profits, pages 6 and 7. English money, page 5. A fluctuation of  $\frac{1}{2}\%$  in the rate amounts to about 25.3 cents on \$1,000. Write amounts as follows, giving preference to first form:

*Three Hundred Twenty Eight Pounds, Twelve Shillings, Five Pence, Sterling.*

Or: .....Pounds,  $\frac{12}{s}$  Sterling.

It is sometimes permissible to use *Stg.* for *Sterling*, but the full word is always best.

The table above reduces dollars and cents to pounds and decimals of pounds. The table below reduces the decimals of pounds to shillings and pence; which last will be found at the top and side. In adding two or more numbers together, use three or four decimals, according to the degree of accuracy required.

## Money of Turkey, India, Portugal, Etc.

### Money of Turkey.

The monetary unit of Turkey is the piaster, not the pound, which was at one time worth about 25 cents, but it has depreciated in value to such an extent that at the present time it is only worth about 4.4 cents. Turkish gold coins are the 25, 50, 100, 250 and 500 piaster pieces, and these coins have come to be called the  $\frac{1}{4}$ ,  $\frac{1}{2}$ , 1,  $2\frac{1}{2}$  and 5 pound, or lira, pieces respectively. Foreign exchange quotations on Turkish money are always at so much per "Turkish pound" whenever they are quoted at all; but foreign exchange transactions with Turkey are usually written in English pounds, or French francs, or sometimes in German marks. Some exchange jobbers do not quote the value of Turkish pounds on their rate sheets, practically not recognizing the exchange; others quote it. The par value of the gold pound is \$4.396, something less than the English pound. With the piaster as one one-hundredth, the currency is decimal, instead of three columned like the English. Gold coins are  $916\frac{2}{3}$ , or  $11/12$ , parts fine the same as English gold. Silver coins are the  $\frac{1}{2}$ , 1, 2, 5, 10 and 20 piaster pieces, and are 830 parts fine. Minor coins are of copper.

The following table will be helpful in converting United States money into Turkish money, but the volume of business done scarcely warrants the space for converting pounds into dollars, for it is not difficult to figure, requiring simple multiplication only by the rate, and fractional rates are seldom if ever quoted. Write amounts as follows:

*One Hundred Twenty Five and  $\frac{20}{100}$  Turkish Pounds. Ltq. 125  $\frac{25}{100}$*

Dollars and Cents to Turkish Pounds and Piasters.

The money of Egypt is a pound, and, like the Turkish pound, is composed of one hundred piasters, but it has not quite the same value. It is worth in United States money \$4.943. It does not enter into exchange transactions to any great extent, because Egypt practically belongs to England; the pound sterling is legal tender for  $97\frac{1}{2}$  piasters; and drafts are almost always written in English or French money.

### Money of India and Burmah.

It is seldom that an American bank clerk will be called upon to write drafts in Indian rupees, or to figure their value in United States money, but it sometimes happens. Foreign exchange transactions are mostly carried on in English money "at exchange on London." The money of the country is three columned, like the English; 1 Rupee = 16 Annas; 1 Anna = 4 Pice. The English pound, or sovereign, is the standard coin, but the money of account is the rupee. The money most used is the silver  $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{1}{2}$  and 1 rupee pieces, and minor copper coins. Paper money is used in the ordinary multiples of 5's and 10's. Silver is coined  $916\frac{2}{3}$  parts fine. England maintains the value of the rupee on a gold basis at 15 to the pound, which makes it worth at par 16 pence, or about 32.44 cents in United States money.

The following tables will be helpful in converting dollars into rupees, for those who find a use for them. When writing drafts, it is well to disregard and avoid the pice as the anna is worth only about 2 cents and is small enough for all ordinary purposes.

## Dollars to Rupees and Decimals of Rupees.

	10000	2000	3000	4000	5000	6000	7000	8000	9000
33	3030303	6060606	9090909	1212121	1515152	1818182	2121212	2424242	2727273

## Value of Decimals in Annas.

.0625 = 1 Anna.	.25 = 4 Annas.	.4375 = 7 Annas.	.625 = 10 Annas.	.8125 = 13 Annas.
.125 = 2 "	.3125 = 5 "	.5 = 8 "	.6875 = 11 "	.875 = 14 "
.1875 = 3 "	.375 = 6 "	.5625 = 9 "	.75 = 12 "	.9375 = 15 "

## Value of Annas in Cents, for any rate from 33 to 34 cents.

1a = 2cts.	3a = 6cts.	5a = 10cts.	7a = 15cts.	9a = 19cts.	11a = 23cts.	13a = 27cts.	15a =
2a = 4cts.	4a = 8cts.	6a = 13cts.	8a = 17cts.	10a = 21cts.	12a = 25cts.	14a = 29cts.	31cts.

Checks and drafts in Indian rupees should be written as follows:

*Five Hundred Sixty Four Rupees, Eleven Annas. Rs. 564-11-0.*

The Island of Ceylon has a rupee as its monetary unit, but the currency is decimal and it is not of the same value as the Indian rupee. German East Africa also has a rupee of 100 hellers. The Ceylon and East African rupee, though supposedly corresponding in value to that of India, varies in value according to the price of silver bullion. Drafts on East African points should be written in English, French or German money, at exchange on London, Paris or Berlin.

## Money of Portugal and Brazil.

Portuguese milreis is another kind of money that is not much used in foreign exchange transactions, though it is quoted on the rate sheets of most exchange jobbers and bankers. Drafts on the country are commonly written either in English, French or German money "at exchange" on London, Paris or Berlin, as the case may be. This money and that of Brazil, which had its origin in it, differs from all other decimal moneys of the world in that it is not strictly decimal, as we use the word, that is, by hundredths, but is by thousandths instead, much as our own money would be if there were no dimes or cents but only mills. 1 Milreis = 1000 Reis.

The money of Portugal is on a silver and a depreciated paper basis, gold coins being rarely seen. What gold there is and the silver coins are 916 $\frac{2}{3}$  parts fine. Exchange rates fluctuate widely, so that tables would have to be voluminous to be of much value. To convert milreis into dollars, multiply by the rate; to convert dollars into milreis divide by the rate.

The manner of writing and punctuating Portuguese and Brazilian checks and drafts differs from the custom of other decimal moneys, and is a little confusing to one not accustomed to it. One thousand milreis is called a conto, and it is the custom to put a colon between the contos and the milreis much as we sometimes put a comma between the thousands and the hundreds of dollars when pointing off our money. And where we put a decimal point they put a dollar sign. Two thousand six hundred thirty four milreis, two hundred fifty reis, would be written and punctuated as in the following example:

*Two Thousand Six Hundred Thirty Four and <sup>250</sup>/<sub>1000</sub> Milreis. Rs. 2:634\$250.*

On South African points drafts should be written in English money; on West and North Africa, in English or French money. Drafts on Siam, or what is called Farther India, the Straits Settlements, Labuan, and other points in that part of the world, should be written in English money. Drafts on western Asiatic points should be written in English, French or German money. Always remember "At exchange on London," or "Paris," or "Berlin," or, what is better, "At payee's purchasing rate for checks on London," or "Paris," or "Berlin," as the case may be.

# French Money, etc. Dollars and Cents to Francs and Centimes, And Other Monneys.

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Finmarks.

All of these countries have decimal monetary systems of the same value, though not of the same name, see page 100. A fluctuation of 1-32 per cent in the rate amounts to  $31\frac{1}{4}$  cents on \$1,000. Write amounts as follows; avoid odd centimes:

*Three Hundred Seventy Six and  $\frac{20}{100}$  Francs.* Or Lire. Or Goldens. Or Finmarks. Or Lei. See forms on pages 91 to 99.

Dollars  
to  
Francs  
etc

# French Money, etc. Dollars and Cents to Francs and Centimes, And Other Money.

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Fimmarks.

All of these countries have decimal monetary systems of the same value, though not of the same name, see page 100. A fluctuation of 1-32 per cent in the rate amounts to 31<sup>1</sup>/<sub>2</sub> cents on \$1,000. Write amounts as follows; avoid odd centimes:

*Three Hundred Seventy Six and <sup>20</sup>/<sub>100</sub> Francs.* Or Lire, Or Fimmarks. Or Guilders, Or Lei. See forms on pages 94 to 99.

51 **French Money, etc. Dollars and Cents to Francs and Centimes, And Other Monneys.**

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Finmarks.

All of these countries have decimal monetary systems of the same value, though not of the same name, see page 100. A fluctuation of 1-32 per cent in the rate amounts to 3 1/4 cents on \$1,000. Write amounts as follows; avoid odd centimes:

*Three Hundred Seventy Six and 20/100 Francs.* Or Lire, Or Goldlers, Or Li. See forms on pages 94 to 99.

Francs etc to Dollars

5.16<sup>7/8</sup>

# French Money, etc. Dollars and Cents to Francs and Centimes, And Other Moncys.

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Finnmarks.

All of these countries have decimal monetary systems of the same value, though not of the same name, see page 100. A fluctuation of 1-32 per cent in the rate amounts to 31 <sup>1</sup>/<sub>4</sub> cents on \$1,000. Write amounts as follows; avoid odd centimes:

*Three Hundred Seventy Six and <sup>20</sup>/<sub>100</sub> Francs.*

Or *Livre.* Or *Goldfr.* See *forms* on  
Or *Finnmarks.* Or *Li.* page 94 to 99.

# French Money, etc. Dollars and Cents to Francs and Centimes, And Other Moneys.

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Finnmarks.

All of these countries have decimal monetary systems of the same value, though not of the same name, see page 100. A fluctuation of 1-32 per cent in the rate amounts to  $3\frac{1}{4}$  cents on \$1,000. Write amounts as follows; avoid odd centimes:

*Three Hundred Seventy Six and  $\frac{20}{100}$  Francs.*

Or Lire. Or Goldfrs. See forms on  
Or Finnmarks. Or Lt. pages 94 to 99.

# French Money, etc. Dollars and Cents to Francs and Centimes, And Other Moneys.

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Finmarks.

All of these countries have decimal monetary systems of the same value though not of the same name, see page 100. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1,000. Write amounts as follows; avoid odd centimes:

## Three Hundred Seventy Six and <sup>20</sup>/<sub>100</sub> Francs.

Or Lire. Or Goldfrs. See forms on  
pages 94 to 99.  
Or Finmarks. Or Ls.

Francs  
etc  
to  
Dollars

5.22<sup>1/2</sup>

# French Money, etc. Dollars and Cents to Francs and Centimes, And Other Monies.

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Finmarks.

All of these countries have decimal monetary systems of the same value though not of the same name, see page 100. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1.000. Write amounts as follows; avoid odd centimes:

*Three Hundred Seventy Six and 20/100 Francs.* Or Lire. Or Goldens. See forms on  
Or Finmarks. Or Li. pages 94 to 99.

# French Money, etc. Dollars and Cents to Francs and Centimes, And Other Moneys.

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Finmarks.

All of these countries have decimal monetary systems of the same value though not of the same name, see page 100. A fluctuation of 1-32 per cent in the rate amounts to 31 1/2 cents on \$1,000. Write amounts as follows; avoid odd centimes:

*Three Hundred Seventy Six and 20/100 Francs.* Or Lire.  
Or Finmarks. Or Guilders.  
Or Lei. See forms on  
pages 94 to 99.

Dollars  
to  
Francs  
etc

Francs etc to Dollars

5.26 7/8

# French Money, etc. Dollars and Cents to Francs and Centimes, And Other Moneys.

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Finmarks.

All of these countries have decimal monetary systems of the same value though not of the same name, see page 100. A fluctuation of 1-32 per cent in the rate amounts to 31 $\frac{1}{4}$  cents on \$1,000. Write amounts as follows; avoid odd centimes:

*Three Hundred Seventy Six and  $\frac{20}{100}$  Francs.* Or Lire.  
Or Finmarks. Or Goldfrs.  
Or Lvs. See forms on  
pages 94 to 99.

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 31 $\frac{1}{2}$  cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and  $\frac{20}{100}$  Marks.*

	10000	20000	30000	40000	50000	60000	70000	80000	90000

70 **German Money. Dollars and Cents to Marks and Pfennigs.**

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and <sup>20</sup>/<sub>100</sub> Marks.*

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and 20/100 Marks.*

		10000	20000	30000	40000	50000	60000	70000	80000	90000

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 3¼ cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and <sup>20</sup>/<sub>100</sub> Marks.*

		10000	20000	30000	40000	50000	60000	70000	80000	90000

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1,000. Write amounts as follows; avoid odd pennings:

*Twenty Eight Thousand Seven Hundred Ninety Three and 20/100 Marks.*

Dollars  
to  
Marks

78 **German Money. Dollars and Cents to Marks and Pfennigs.**

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 31 $\frac{1}{2}$  cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and <sup>20</sup>/<sub>100</sub> Marks.*

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennig.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 3 1/4 cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and 20/100 Marks.*

		10000	2000	3000	4000	5000	6000	7000	8000	9000

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichsmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 3¼ cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and <sup>20</sup>/<sub>100</sub> Marks.*

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and <sup>20</sup>/<sub>100</sub> Marks.*

Dollars  
to  
Marks

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and <sup>20</sup>/<sub>100</sub> Marks.*

Dollars  
to  
Marks

95 <sup>3</sup>/<sub>8</sub>

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and <sup>20</sup>/<sub>100</sub> Marks.*

		10000	20000	30000	40000	50000	60000	70000	80000	90000

90 **German Money. Dollars and Cents to Marks and Pfennigs.**

1 Reichmark or Mark = 100 Pfennige.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and 20/100 Marks.*

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennig.

For figuring profits when exchange on Germany is quoted per 4 marks, see directions given on page 4. A fluctuation of 1-32 per cent in the rate amounts to 3 1/4 cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and 20/100 Marks.*

# Spanish Money, etc. Dollars and Cents to Pesetas and Centimos, And Other Monneys.

Spain, Pesetas. Bulgaria, Levs. Roumania, Lei. Servia, Dinars. Greece, Drachmae.

All countries using money for which the tables here given are available have decimal systems, and their gold monetary unit is of the same value, see page 100. A fluctuation of .05 in the rate amounts to from \$2.90 to \$3.15 on \$1,000. Write amounts as follows:

*Two Hundred Eighteen and <sup>50</sup>/<sub>100</sub> Pesetas.* Or other monies, see top of page.

# Spanish Money, etc. Dollars and Cents to Pesetas and Centimos.

And Other

Monneys.

Spain, Pesetas. Bulgaria, Levs. Romania, Lei. Servia, Dinars. Greece, Drachmae.

All countries using money for which the tables here given are available have decimal systems, and their gold monetary unit is of the same value, see page 100. A fluctuation of .05 in the rate amounts to from \$2.65 to \$2.85 on \$1,000. Write amounts as follows:

*Two Hundred Eighteen and 50/100 Pesetas.* Or other monies, see top of page.

## Money of France, Belgium, Switzerland, Italy, Spain, Finland, Bulgaria, Roumania, Servia, Greece and Venezuela.

### *How to convert United States money into French and other moneys of like value, and vice versa.*

Exchange on the principle countries mentioned at the head of this page is quoted in two ways, (1) per dollar, by steps of five-eighths of a centime, from about Fcs. 5.15 to 5.25, and, (2) per franc, lira, etc. by steps of one one-hundredth of a cent, from about 19.2 to 19.5 cts. When quoted per dollar, a fluctuation of five-eighths of a centime amounts to about \$1.20 on \$1,000. This is too great a step, and quotations are supplemented by adding or subtracting some fractional part of one per cent of the amount of United States money. This makes it difficult to figure without the use of conversion tables,

French  
Money  
Etc.

When French exchange is quoted per dollar, to convert francs into dollars, divide by the rate and add or subtract the fractional part of one per cent.

To convert dollars into francs, if the rate is minus, add the fractional part of one per cent and multiply by the rate; if the rate is plus, subtract the fractional part of one per cent and multiply by the rate.

When exchange is quoted per franc, there are no fractions, and conversion becomes a question of simple multiplication or long division. To convert francs into dollars, multiply by the rate; and to convert dollars into francs, divide by the rate.

### *How to write checks and drafts.*

A check or draft on any of the above countries should be written as a U. S. check or draft on your own bank is written: instead of using the word, Dollars, mention the kind of money in which it is payable; for instance, if payable in France, Belgium or Switzerland, write, Francs; if in Italy, Lire; if in Spain, Pesetas; if in Finland, Finmarks; if in Bulgaria, Levs, or Goldlevs; if in Roumania, Lei; if in Servia, Dinars; if in Greece, Drachmas, or Drachmæ. On some of these countries, drafts are seldom drawn except in pounds, francs or marks, and usually "at exchange on London," or "Paris," as the case may be.

The abbreviations that should be used on drafts, as mentioned above, are as follows, and

in the order named. Where two forms are given, the first is the better. With some it is best to use the full word, Fcs., or F.; L<sup>ira</sup>; P<sup>tes</sup>; Fmk., or Fm.; G. Levs, or Levs; Lei; Dinars; D<sup>rs</sup>.

Drafts payable in French territory should have the date written out in full as illustrated at the heads of the pages for French money. This is on account of the internal revenue tax laws which impose a tax on checks and drafts not promptly presented for payment. On commercial drafts (Bills of Exchange), there is a stamp tax of 1-20 of 1 per cent. Grace is allowed until noon the day after maturity.

The countries mentioned at the head of this page all have money of the same value though not of the same name. They all have decimal systems, one hundred of the smaller units making one of the larger. Some of them use gold, paper and silver as a circulating medium, which are in general use; others are on a paper and silver basis, gold seldom being seen. Those countries using most gold, as a rule do not issue the smaller denominations of paper; those using little or no gold of course requiring it. Paper money most frequently met with is in denominations of 5, 10, 20, 50, 100, 500 and 1000 units.

French gold (a term applied to the gold of all these countries) is coined 900 parts fine and 100 parts alloy, and its minting or par value is 19.3 cents per unit, franc, lira, etc. Silver coins of the 5 small unit denominations or larger are also 900 parts fine, but silver coins of less than 5 units are 835 parts fine, except in Finland, where the 1 and 2 markkaa pieces are 868 parts fine, and the 25 and 50 penni pieces are 750 parts fine.

The market value of the paper money of these countries fluctuates according to the credit of the country issuing it, and according to the commercial value of its exchange. That of those on a sound financial basis fluctuates (New York purchasing rates) from about 19 to 19.30. Gold usually runs a trifle higher, perhaps from about 19.10 to 19.35; and silver is worth anywhere from its bullion value to within a fraction of a cent of its nominal value, according to the country whose stamp it bears.

## Profit Table for French <sup>And Other</sup> Moneys, By .01, .02, Etc.

Example.—A customer wants a draft worth \$1200; the quoted cost rate is 19.38; the profit desired is \$3.60. At the right of the figures 1200, it will be seen that an advance in the rate of .06 will yield a profit of \$3.73; therefore quote 19.44 (19.38 + .06). For amounts not given here, take a fractional part, like one tenth, or a multiple of some other number.

# French Money, etc. Dollars and Cents to Francs and Centimes, And Other Monneys.

France, Belgium and Switzerland, Francs. Italy. Lire. Finland, Finmarks.

All of these countries have decimal monetary systems of the same value, though not of the same name, see page 100. A fluctuation of .01 in the rate amounts to about 52 cents on \$1,000. Write amounts as follows; avoid odd centimes:

*Two Hundred Eighteen and <sup>20</sup>/<sub>100</sub> Francs.* Or other monies, see top of page.

Dollars to Francs etc

Francs  
etc  
to  
Dollars  
  
19

# French Money, etc. Dollars and Cents to Francs and Centimes, <sup>And Other</sup> Monneys.

France, Belgium and Switzerland, Francs. Italy, Lire. Finland, Fimarks.

All of these countries have decimal monetary systems of the same value, though not of the same name, see page 100. A fluctuation of .01 in the rate amounts to about 52 cents on \$1,000. Write amounts as follows; avoid odd centimes:

*Two Hundred Eighteen and <sup>20</sup>/<sub>100</sub> Francs.* Or other monies, see top of page.

Dollars  
to  
Francs

## AUSTRIA-HUNGARIAN MONEY.

106

### *How to convert United States money into Austria-Hungarian money, and vice versa.*

Exchange on Austria-Hungary is seldom, if ever, quoted in the terms used for the three continental countries, France, Germany and Holland, that is, with plus or minus fractional parts of one per cent, but is confined to the value per crown in United States money, as, for instance, 20.34, 20.35, 20.36, and so on, meaning, twenty and thirty-four one-hundredth cents, or twenty and thirty-five one-hundredth cents, as the case may be. For many purposes this covers the requirements, but a step of one one-hundredth of a cent amounts to about 50 cents on \$1,000, and modern banking often-times demands closer figuring, especially for large drafts, so it has become the custom to quote rates to the  $\frac{1}{2}$ , or even the  $\frac{1}{4}$ , hundredth of a cent, as, 20.34, 20.34 $\frac{1}{2}$ , 20.34 $\frac{1}{4}$ , 20.34 $\frac{3}{4}$ , and so on. Conversion of the one kind of money into the other is a question of multiplication or long division. To convert crowns into dollars, multiply by the rate; as, for instance,—

Crs. 1256.75	
Rate <u>20.24<math>\frac{1}{4}</math></u>	Result \$254.40

To convert dollars into crowns, divide by the rate; as, for instance the following in reverse and as proof of the other, care being necessary to point the quotient correctly.

$$202425 \overline{) 254400000} \{ 1256.75$$

### *How to write checks and drafts.*

The writing of checks and drafts is a simple matter. Follow the forms given at the heads of pages 108 to 121. In the body of the draft, it is better to use the Austrian word, Kronen, with its abbreviation, K., or, Kn., for the figures, than the English word, Crowns, with its abbreviation, Crs. There is not the uniformity of usage in this respect that is desirable, and it is probably due to an effort to avoid confusion between the Scandinavian word, Kronor, or, Kroner, and the Austrian word, Kronen; and the abbreviation, Kr., on the one hand, and, K., or, Kn., on the other. The best usage, and that recommended by the

largest foreign exchange jobbers, is to write the word, Kronen, in the text, and the abbreviation, K., with the figures. There is no more danger of confusion or ambiguity in conforming to this rule than to any other. The bank or city on which a draft is drawn will insure its being paid in the right kind of crowns. No teller would pay out Scandinavian crowns from a Vienna bank or Austrian crowns from a Stockholm bank, any more than a Chicago bank would pay out Mexican dollars for a check upon it written in "dollars."

In 1892 Austria-Hungary changed its monetary unit from the florin, or guilder, to the crown. The value of the florin in United States money was 40.52 cents; the crown is worth 20.26 cents. This reduced the value of the unit just one half. As a matter of course, the coins of the former system remained in circulation for a number of years, but are now rapidly disappearing owing to their demonetization, and the new coins and paper money are used almost exclusively. Paper money is issued in denominations of 5, 10, 50, 100 and 1000 kronen. Gold is coined in 10 and 20 krone pieces; silver in 1, 2 and 5 krone pieces. The 2 krone piece is the old florin. Gold coins and the silver 5 krone piece and the florin are 900 parts fine; but the 1 krone piece is 835 parts fine. The 10 and 20 heller pieces are nickel; the 1 and 2 heller pieces are copper.

In the old system, there were 4 and 8 florin and 1, 2 and 4 ducat gold coins. The ducat was worth about \$2.29. The only coin of the old system remaining in the new is the 1 florin silver piece.

There is not a great deal of business done in the United States with Austria-Hungary in the way of commercial drafts (Bills of Exchange). Such drafts are generally drawn in the money of those countries having seaport cities on the Atlantic ocean and its waters.

The market value of the money of Austria-Hungary in New York has, if anything, a little wider range of fluctuation than the money of France and Germany, but all in all bears about the same relation to its par value. There is not so much of it reaches this country, and its value is not so well advertised by bankers.

## Profit Table for Austria-Hungarian Money.

Example.—A customer wants a draft worth \$1200; the quoted cost rate is 20.34; the profit desired is \$4.60. At the right of the figures 1200, it will be seen that an advance in the rate of .08 will yield a profit of \$4.72; therefore quote 20.12 (20.34 + .08). For amounts not given here, take a fractional part, like one tenth, or a multiple of some other number.

# Austria-Hungarian Money. Dollars and Cents to Crowns and Hellers.

1 Crown or Krone = 100 Hellers.

For figuring profits see page 107. Money of Austria-Hungary page 106. A fluctuation of .01 in the rate amounts to about 50 cents on \$1,000. In writing drafts, it is better to use the word, Kronen, than the English word, Crowns. Write amounts as follows;

*Twenty Six Thousand Seven Hundred Eighty One and <sup>20</sup>/<sub>100</sub> Kronen.*

Dollars  
to  
Crowns

# Crowns and Hellers to Dollars and Cents. Austria-Hungarian Money.

1 Crown or Krone = 100 Hellers.

Value of coins, page 190. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about  $12\frac{1}{2}$  cents on \$1,000. Write figures as follows, K. for Kronen, Crs. for Crowns; give preference to first form; avoid odd hellers:

*K. 6781<sup>20</sup>*

*Kr. 781<sup>50</sup>*

(or *Crs. 266<sup>25</sup>*)

K.	281	$\frac{20}{100}$

# Austria-Hungarian Money. Dollars and Cents to Crowns and Hellers.

1 Crown or Krone = 100 Hellers.

For figuring profits see page 107. Money of Austria-Hungary page 106. A fluctuation of .01 in the rate amounts to about 50 cents on \$1.000. In writing drafts, it is better to use the word, Kronen, than the English word, Crowns. Write amounts as follows;

*Twenty Six Thousand Seven Hundred Eighty One and <sup>20</sup>/<sub>100</sub> Kronen.*

# Crowns and Hellers to Dollars and Cents. Austria-Hungarian Money.

1 Crown or Krone = 100 Hellers.

Value of coins, page 190. A fluctuation of  $\frac{1}{2}$  in the rate amounts to about  $12\frac{1}{2}$  cents on \$1.000. Write figures as follows, K. for Kronen, Crs. for Crowns; give preference to first form; avoid odd hellers:

*K. 6781<sup>20</sup>*      *Kn. 781<sup>50</sup>*      (or *Crs. 266<sup>25</sup>*)      *K. 281<sup>20</sup>* / *100*

# Austria-Hungarian Money. Dollars and Cents to Crowns and Hellers.

1 Crown or Krone = 100 Hellers.

For figuring profits see page 107. Money of Austria-Hungary page 106. A fluctuation of .01 in the rate amounts to about 49 cents on \$1,000. In writing drafts, it is better to use the word, Kronen, than the English word, Crowns. Write amounts as follows:

*Twenty Six Thousand Seven Hundred Eighty One and <sup>20</sup>/<sub>100</sub> Kronen.*

Dollars  
to  
Crowns

# Crowns and Hellers to Dollars and Cents. Austria-Hungarian Money.

1 Crown or Krone = 100 Hellers.

Value of coins, page 190. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about  $12\frac{1}{2}$  cents on \$1,000. Write figures as follows, K. for Kronen, Crs. for Crowns; give preference to first form; avoid odd hellers:

K. 6781 <sup>20</sup>

Kr. 781 <sup>50</sup>

(or Crs. 266 <sup>25</sup>)

K. 281 <sup>20</sup>

## Austria-Hungarian Money. Dollars and Cents to Crowns and Hellers.

1 Crown or Krone = 100 Hellers.

For figuring profits see page 107. Money of Austria-Hungary page 106. A fluctuation of .01 in the rate amounts to about 49 cents on \$1,000. In writing drafts, it is better to use the word, Kronen, than the English word, Crowns. Write amounts as follows;

*Twenty Six Thousand Seven Hundred Eighty One and <sup>20</sup>/<sub>100</sub> Kronen.*

	10000	20000	30000	40000	50000	60000	70000	80000	90000

# Crowns and Hellers to Dollars and Cents. Austria-Hungarian Money.

1 Crown or Krone = 100 Hellers.

Value of coins, page 190. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about  $12\frac{1}{2}$  cents on \$1,000. Write figures as follows, K. for Kronen, Crs. for Crowns; give preference to first form; avoid odd hellers:

K. 6781<sup>20</sup>

Kn. 781<sup>50</sup>

(or Crs. 266<sup>25</sup>)

K. 281  $\frac{20}{100}$

# Austria-Hungarian Money. Dollars and Cents to Crowns and Hellers.

1 Crown or Krone = 100 Hellers.

For figuring profits see page 107. Money of Austria-Hungary page 106. A fluctuation of .01 in the rate amounts to about 49 cents on \$1,000. In writing drafts, it is better to use the word, Kronen, than the English word, Crowns. Write amounts as follows;

*Twenty Six Thousand Seven Hundred Eighty One and <sup>20</sup>/<sub>100</sub> Kronen.*

# Crowns and Hellers to Dollars and Cents. Austria-Hungarian Money.

1 Crown or Krone = 100 Hellers.

Value of coins, page 190. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about 12 $\frac{1}{2}$  cents on \$1.000. Write figures as follows, K. for Kronen, Crs. for Crowns; give preference to first form; avoid odd hellers:

K. 6781<sup>20</sup>

Kn. 781<sup>50</sup>

(or Crs. 266<sup>25</sup>)

K.	281	$\frac{20}{100}$

# Austria-Hungarian Money. Dollars and Cents to Crowns and Hellers.

1 Crown or Krone = 100 Hellers.

For figuring profits see page 107. Money of Austria-Hungary page 106. A fluctuation of .01 in the rate amounts to about 49 cents on \$1,000. In writing drafts, it is better to use the word, Kronen, than the English word, Crowns. Write amounts as follows;

*Twenty Six Thousand Seven Hundred Eighty One and <sup>20</sup>/<sub>100</sub> Kronen.*

Dollars  
to  
Crowns

# Crowns and Hellers to Dollars and Cents. Austria-Hungarian Money.

1 Crown or Krone = 100 Hellers.

Value of coins, page 190. A fluctuation of  $\frac{1}{2}$  in the rate amounts to about  $12\frac{1}{2}$  cents on \$1.000. Write figures as follows, K. for Kronen, Crs. for Crowns; give preference to first form; avoid odd hellers:

*K. 6781<sup>20</sup>*

*Kn. 781<sup>50</sup>*

(or *Crs. 266<sup>25</sup>*)

K.	281	$\frac{20}{100}$

## Austria-Hungarian Money. Dollars and Cents to Crowns and Hellers.

1 Crown or Krone = 100 Hellers.

For figuring profits see page 107. Money of Austria-Hungary page 106. A fluctuation of .01 in the rate amounts to about 49 cents on \$1,000. In writing drafts, it is better to use the word, Kronen, than the English word, Crowns. Write amounts as follows;

*Twenty Six Thousand Seven Hundred Eighty One and <sup>20</sup>/<sub>100</sub> Kronen.*

	100000	20000	30000	40000	50000	60000	70000	80000	90000

# Crowns and Hellers to Dollars and Cents. Austria-Hungarian Money.

1 Crown or Krone 100 Hellers.

Value of coins, page 190. A fluctuation of  $\frac{1}{4}$  in the rate amounts to about  $12\frac{1}{2}$  cents on \$1.000. Write figures as follows, K. for Kronen, Crs. for Crowns; give preference to first form; avoid odd hellers:

K. 6781<sup>20</sup>

Kn. 781<sup>50</sup>

(or Crs. 266<sup>25</sup>)

K.	281	$\frac{20}{100}$

## GERMAN MONEY.

### *How to convert United States money into German money, and vice versa.*

Exchange on Germany is quoted in two ways, (1) by single marks in cents and hundredths of a cent, as, 23.84, 23.85, 23.86, and so on, and, (2) by 4 marks in cents and fractional parts of a cent, as,  $94^{13} \frac{1}{4}$ ,  $94^{13} \frac{1}{16}$ , and so on. The single mark quotations are generally used for small drafts sold over the counter; the four mark quotations are for large drafts and bills of exchange. But a step of  $\frac{1}{16}$  of a cent for every 4 marks amounts to about  $62\frac{1}{2}$  cents on \$1,000, and this is too great for business purposes, so quotations are supplemented by adding or subtracting  $\frac{1}{64}$ ,  $\frac{1}{32}$  or  $\frac{3}{64}$  of 1 per cent of the amount of United States money as needs be. A quotation reading  $94^{13} \frac{1}{16} - \frac{1}{32}$  means that every 4 marks is worth in United States money  $94^{13} \frac{1}{16}$  cents minus  $\frac{1}{32}$  of 1 per cent of  $94^{13} \frac{1}{16}$ . This makes it difficult to figure without the aid of conversion tables especially when finding the value of dollars in marks.

When exchange is quoted per single mark, to convert marks into dollars, multiply by the rate; to convert dollars into marks, divide by the rate.

When exchange is quoted per four marks, to convert marks into dollars, multiply by the rate and divide by 4; if there are supplementary fractions of plus or minus, add or subtract the amount as indicated.

To convert dollars into marks, if there are no supplementary fractions, multiply by 4 and divide by the rate; if there are supplementary fractions, and if they are plus, subtract the indicated amount, multiply by 4 and divide; if the fractions are minus, add the indicated amount, multiply by 4 and divide.

### *How to write checks and drafts.*

It is an easy and simple matter to write drafts on German banks. Follow the forms given at the heads of pages 68 to 93 and 124 to 127. Write the word, Marks, in the body of the draft and the letter, M, with the figures. Drafts on German banks, unless the money is on deposit or to one's credit, are subject to the same internal revenue tax laws as bills of

exchange; it is therefore necessary in checking against money on deposit to see that drafts read, "Pay 'out of balance,' or, 'out of balance on deposit,' or, 'out of money to our credit,' to the order of," etc., or words to that effect, otherwise there is a stamp tax against it of one twentieth of one per cent of the amount. Eastern bankers and exchange jobbers, who furnish forms for such purposes, have them printed to read in the proper manner.

On commercial drafts (Bills of Exchange) payable in Germany, there is an internal revenue stamp tax amounting to one twentieth of one per cent. Properly speaking there are no days of grace but bankers may allow two days from date of maturity before protesting paper for non-payment.

It is customary, when drawing against consignments of goods to European markets, to write drafts either in English, French, German or Dutch money, whichever is most available to bankers, even when the goods are shipped to points in other countries further east and south using other kinds of money. Bills of exchange so written usually command a higher price in the market. Where drafts are intended as remittances to points outside of Germany but are written in marks, there should be written across their face, "At payee's purchasing rate for checks on Berlin," or words of similar import.

Paper money in Germany is issued in denominations of 5, 20, 50, 100 and 1000 marks. Gold is coined in 10 and 20 mark pieces. Silver is coined in 1, 2 and 5 mark pieces and in a 50 pfennig piece. Nickel coins are the 5, 10 and 25 pfennig pieces; and copper coins are the 1 and 2 pfennig pieces. Both gold and silver are 900 parts fine and 100 parts alloy, the same as United States coins.

The market value of German paper money (New York purchasing rates) fluctuates from about 23.5 to 23.7 cts. per mark, the smaller denominations commanding a higher price than the larger. Gold usually runs about the same, perhaps to 23.75. Silver varies in value from about 23 to about  $23\frac{3}{4}$  cts. New York selling rates are from one-fourth to one-half a cent above purchasing rates.

## Profit Table for German Money, By .01, .02, Etc.

Example.—A customer wants a draft worth \$1200; the quoted cost rate is 23.90; the profit desired is \$3.00. At the right of the figures 1200, it will be seen that an advance in the rate of .06 will yield a profit of \$3.02; therefore quote 23.96 (23.90 + .06). For amounts not given here, take a fractional part, like one tenth, or a multiple of some other number.

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennige.

For figuring profits see page 123. When exchange on Germany is quoted per 4 marks instead of per 1 mark, see pages 68 to 93. A fluctuation of .01 in the rate amounts to about 42 cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and <sup>20</sup>/<sub>100</sub> Marks.*

Dollars

# German Money. Dollars and Cents to Marks and Pfennigs.

1 Reichmark or Mark = 100 Pfennige.

For figuring profits see page 123. When exchange on Germany is quoted per 4 marks instead of per 1 mark, see pages 68 to 93. A fluctuation of .01 in the rate amounts to about 42 cents on \$1,000. Write amounts as follows; avoid odd pfennigs:

*Twenty Eight Thousand Seven Hundred Ninety Three and <sup>20</sup>/<sub>100</sub> Marks.*

									229900

THE three countries of Sweden, Norway and Denmark constitute what is known as Scandinavia. They all have the same monetary system, 100 ore making 1 (English) crown. The unit is in Sweden written, Krona, and the plural is, Kronor; the same unit is in Norway and Denmark written, Krone, and the plural is, Kroner. When writing drafts on those countries, it is well to bear these facts in mind and spell the word as it is spelled in the country where it is to be paid. Follow the forms given at the heads of pages 130 to 139. The par value of the Krone, or Krona, in United States money, is 26.8 cents. To convert the one kind of money into the other is a question of multiplication or long division. To convert crowns into dollars, multiply by the rate; to convert dollars into crowns, divide by the rate.

Exchange on Scandinavian countries is never quoted as French, German and Dutch exchange is quoted, that is with supplementary fractions of plus or minus some part of one per cent, but is confined to the value of the single crown. In this book the tables are computed to the  $\frac{1}{2}$  hundredth of a cent, and some may think that an unnecessary degree of closeness; but the truth is, exchange on no other European country is quoted by steps so large as the full one hundredth of a cent per Scandinavian crown. A step of .05 of a cent per English pound amounts to about 10 cents on a thousand dollars. With French, German and Dutch monies, a step of  $\frac{1}{64}$  of one per cent amounts to 15.6 cents on a thousand dollars. Austrian exchange is quoted to the  $\frac{1}{4}$  hundredth of a cent which amounts to about  $12\frac{1}{2}$  cents on a thousand dollars. A step of one even hundredth of a cent on Russian money amounts to about 19 cents on a thousand dollars. A step of an even hundredth of a cent on a Scandinavian crown amounts to about 37 cents on a thousand dollars; and there is no reason why it should not be quoted to the half of that.

When writing drafts, not only on Scandinavian banks but on banks throughout Europe, it is well to remember that the identification of the payee is not required as in the United States, though care is used as a matter of business policy, and especially if there is any suspicion that a check or draft is in wrong hands. In this country, if a bank pays out

money on a forged endorsement, it is holden for the amount; but that is not true in most European countries. There, if a man loses his draft, and some other person gets it and cashes it, he has lost his money unless he can recover it from the one who got it. But the criminal laws are more severe and justice is speedier there than here. Where parties are themselves going to Europe, and buy drafts for remittances payable to their own order, and if the amount is large, it is often advisable to ask for an identification signature, or one may be clipped from a letter, which may be forwarded with the advice; this will insure payment to the proper parties.

Commercial drafts (Bills of Exchange) drawn against consignments of merchandise to Scandinavian points are usually, though not always, written in English, Dutch or German money. There is an internal revenue stamp tax of one twentieth of one per cent.

When sending money to Scandinavian, and some other European points, especially to places outside of, or away from the larger cities, it is often preferable to remit through the Post Offices of those countries instead of by bank draft. Chicago and New York bankers furnish forms for this purpose and transact the business, and, while the rate is a trifle higher, with a flat charge also of about 15 or 20 cents extra, the convenience to the payee of receiving his money practically at his own door more than offsets the small extra expense. The facilities in Norway, Sweden and Denmark for remitting money in this manner are good.

The paper money of these countries is issued in denominations of 5, 10, 50, 100, 500 and 1000 kronor. Gold coins are the 5, 10 and 20 krone pieces. Silver coins are the 1 and 2 krone pieces, and the 10, 25, 40 and 50 ore pieces. Copper coins are the 1, 2 and 5 ore pieces. Gold is 900 parts fine. The 1 and 2 krone silver pieces are 800 parts fine; the 25, 40 and 50 ore pieces are 600 parts fine; and the 10 ore piece is 400 parts fine.

The market value of Scandinavian paper, gold and silver money (New York purchasing rates) fluctuates in the neighborhood of  $\frac{1}{4}$  to  $\frac{1}{2}$  cent per krone below the exchange rate. Selling rates are probably  $\frac{1}{2}$  cent per krone above purchasing rates.

## Profit Table for Scandinavian Money.

Example.—A customer wants a draft worth \$1200; the quoted cost rate is 26.90; the profit desired is \$3.00. At the right of the figures 1200, it will be seen that an advance in the rate of .07 will yield a profit of \$3.13; therefore quote 26.97 (26.90 + .07). For amounts not given here, take a fractional part, like one tenth, or a multiple of some other number.

# Scandinavian Money. Dollars and Cents to Crowns and Ore.

1 Crown or Krona (Swedish plural Kronor) = 100 Ore.

For figuring profits, see page 129. Scandinavian money, page 128. When writing drafts on Scandinavian countries, use the plural form, Kronor, for Swedish drafts, and, Kroner, for Norwegian and Danish drafts. Write amounts as follows; avoid odd ore:

Swedish, *Six and <sup>10</sup>/<sub>100</sub> Kroner.* Norwegian and Danish, *Six and <sup>20</sup>/<sub>100</sub> Kroner.*

# Crowns and Ore to Dollars and Cents. Scandinavian Money.

1 Crown or Krone (Norwegian and Danish plural Kroner) = 100 Ore.

Value of coins, page 190. A fluctuation of .01 in the rate amounts to about 38 cents on \$1,000. There is a growing demand for Scandinavian quotations to the  $\frac{1}{2}$  hundredth of a cent. Write figures as follows; give preference to first form:

*Kr. 8976* <sup>20</sup>/<sub>100</sub>

*Kr. 6* <sup>50</sup>/<sub>100</sub>

*K. 406* <sup>25</sup>/<sub>100</sub>

<i>Kr.</i>	<b>796</b>	$\frac{20}{100}$

# Scandinavian Money. Dollars and Cents to Crowns and Ore.

1 Crown or Krona (Swedish plural Kronor) = 100 Ore.

For figuring profits, see page 129. Scandinavian money, page 128. When writing drafts on Scandinavian countries, use the plural form, Kronor, for Swedish drafts, and, Kroner, for Norwegian and Danish drafts. Write amounts as follows; avoid odd ore:

Swedish, *Six and <sup>10</sup>/<sub>100</sub> Kronor.* Norwegian and Danish, *Six and <sup>20</sup>/<sub>100</sub> Kroner.*

# Scandinavian Money. Dollars and Cents to Crowns and Ore.

1 Crown or Krona (Swedish plural Kronor) = 100 Ore.

For figuring profits, see page 129. Scandinavian money, page 128. When writing drafts on Scandinavian countries, use the plural form, Kronor, for Swedish drafts, and Kroner, for Norwegian and Danish drafts. Write amounts as follows; avoid odd ore:

Swedish, *Six and* <sup>10</sup>/<sub>100</sub> *Kronor.* Norwegian and Danish, *Six and* <sup>20</sup>/<sub>100</sub> *Kroner.*

# Scandinavian Money. Dollars and Cents to Crowns and Ore.

1 Crown or Krona (Swedish plural Kronor) = 100 Ore.

For figuring profits, see page 129. Scandinavian money, page 128. When writing drafts on Scandinavian countries, use the plural form, Kronor, for Swedish drafts, and, Kroner, for Norwegian and Danish drafts. Write amounts as follows; avoid odd ore:

Swedish, *Six and* <sup>10</sup>/<sub>100</sub> *Kronor.* Norwegian and Danish, *Six and* <sup>20</sup>/<sub>100</sub> *Kroner.*

# Crowns and Ore to Dollars and Cents. Scandinavian Money.

1 Crown or Krone (Norwegian and Danish plural Kroner) = 100 Ore.

Value of coins, page 190. A fluctuation of .01 in the rate amounts to about 37 cents on \$1,000. There is a growing demand for Scandinavian quotations to the  $\frac{1}{2}$  hundredth of a cent. Write figures as follows; give preference to first form:

*Kr. 8976* <sup>20</sup>/<sub>100</sub>

*Kr. 6* <sup>50</sup>/<sub>100</sub>

*K. 406* <sup>25</sup>/<sub>100</sub>

<i>Kr.</i>	796	<sup>20</sup> / <sub>100</sub>

## DUTCH MONEY.

MUCH the greater part of the foreign exchange business of the United States with continental Europe is written either in the money of England, France, Germany or Holland. English exchange is the most important, and London is the financial center of the world. French exchange is next, and Paris ranks second only to London in its great banking institutions, and in the volume of business done. Then comes Berlin in Germany, with Hamburg as an important point, and Amsterdam and Rotterdam in Holland. Banks located in either Amsterdam or Rotterdam have correspondents in the other city, and an account opened at either point gives important remittance and checking privileges in the other.

Dutch  
Money

Exchange on Holland (often called the Netherlands) is quoted in much the same way as exchange on France and Germany, with the exception that the rate is always on the basis of the value of a single florin, (Dutch guilder), but it is expressed in two different ways: (1) decimally, as, 40.13, 40.14, 40.15, and so on, and (2) fractionally, as,  $40\frac{1}{8}$ ,  $40\frac{3}{16}$ , and so on. The decimal rates are used mostly for small checks and drafts sold over the counter, sometimes for larger drafts also. The fractional rates are used mostly for bills of exchange and for large transactions between bankers. The fractional rates are supplemented, like the French and German quotations, with plus and minus fractional parts of one per cent; see any of the following pages from 142 to 163.

To convert florins into dollars, multiply by the rate, and if there are supplementary fractions, add or subtract the amount as indicated.

To convert dollars into florins, if there are no supplementary fractions, divide by the rate; if there are supplementary fractions, and if they are plus, subtract the fractional part of one per cent and divide; if they are minus add the fractional part of one per cent and divide. This method of figuring will yield a slight, but only a very slight, error. For instance, as an illustration, take the rate  $40\frac{1}{16} - \frac{3}{32}$ , on the basis of \$1,000.  $\frac{3}{32}$  of 1 per cent = \$.9375; added, this makes \$1,000.9375  $1000.9375 \div .400625 = 2498.4399$  According to the table on page 152, \$1000 at  $40\frac{1}{16} - \frac{3}{32}$  equals fl. 2498.4421, a difference of only .0022

of a Dutch cent on \$1000, or less than 1 United States cent on ten thousand dollars. This difference is the maximum error possible; at  $-\frac{1}{32}$ , the error would only be one third of even that small amount.

What is true about the figuring of Dutch exchange, in this respect, is equally true of French and German exchange. On German money, the error cannot be greater than about one half a cent on ten thousand dollars, and will usually be less than that; on French money, the error will be about the same as on Dutch money.

Write drafts on Dutch banks as illustrated at the heads of the pages following. It is better to use the word, Florins, in the body of the draft and the letters, Fl., with the figures. Some use the word, Guilders, with, G., or, Gld., with the figures, but, Florins, with, Fl., is always better.

On commercial drafts and acceptances drawn against Holland merchants or bankers, (Bills of Exchange), there is an internal revenue stamp tax amounting to one twentieth of one per cent, on all paper for more than three days sight. On bills drawn at three days sight or less, there is a flat tax of five Dutch cents regardless of the amount; this may be disregarded in exchange computations.

Paper money is issued in denominations of 10, 25, 40, 50, 60, 100, 200, 300, 500 and 1000 gulden. Gold is coined in 5 and 10 guilder pieces. Silver coins are the  $\frac{1}{4}$ ,  $\frac{1}{2}$ , 1 and  $2\frac{1}{2}$  guilder pieces, and the 5 and 10 cent pieces. Copper coins are the  $\frac{1}{2}$ , 1 and  $2\frac{1}{2}$  cent pieces. Gold is coined 900 parts fine. The  $\frac{1}{2}$ , 1 and  $2\frac{1}{2}$  guilder silver pieces are 945 parts fine; and the 5, 10 and 25 cent pieces are 640 parts fine.

The par value of the florin, or guilder, in United States money, is 40.2 cents.

The monetary systems of the Dutch colonies are the same as that of the mother country.

The market value of the money of Holland (New York purchasing rates) fluctuates, like the exchange rate, according to the demand and supply, but ranges in the neighborhood of 1 cent per florin below the exchange value. Selling rates are  $\frac{1}{2}$  cent, or more, above purchasing rates.

## Profit Table for Dutch Money, By .01, .02, Etc.

Example.—A customer wants a draft worth \$1200; the quoted cost rate is 10.32; the profit desired is \$3.50. At the right of the figures 1200, it will be seen that an advance in the rate of .12 will yield a profit of \$3.58; therefore quote 40.14 (10.32 + .12). For amounts not given here, take a fractional part, like one tenth, or a multiple of some other number.

# Dutch Money. Dollars and Cents to Florins (Guilders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

For figuring profits when exchange on Holland is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , and so on, see directions given on page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows; it is better to use the word, Florins, than the word, Guilders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Guilders.)*

Dollars  
to  
Florins

# Dutch Money. Dollars and Cents to Florins (Guilders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

For figuring profits when exchange on Holland is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , and so on, see directions given on page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows; it is better to use the word, Florins, than the word, Guilders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Guilders.)*

# Dutch Money. Dollars and Cents to Florins (Guilders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

For figuring profits when exchange on Holland is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , and so on, see directions given on page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows; it is better to use the word, Florins, than the word, Guilders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Guilders.)*

Dollars  
to  
Florins

# Florins (Guilders) and Cents to Dollars and Cents. Dutch Money.

Money of Holland.

1 Guilder = 100 Cents.

For values of coins, see page 190. A fluctuation of 1-32 per cent in the rate amounts to 31¼ cents on \$1,000. Write figures as follows; giving preference to the first two forms:

*Fl. 4395*<sup>20</sup>

*Fl. 67*<sup>25</sup>

*G. 395*<sup>20</sup>

<i>Fl.</i>	395	<sup>25</sup> 100

Florins to Dollars

39 5/8

# Dutch Money. Dollars and Cents to Florins (GUILDERS) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

Money of the Netherlands, page 140. For figuring profits when exchange is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , etc., see page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows: it is better to use the word, Florins, than the word, Guilders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Guilders.)*

Dollars  
to  
Florins

# Florins (Guilders) and Cents to Dollars and Cents. Dutch Money.

Money of Holland.                      1 Guilder = 100 Cents.

For values of coins, see page 190. A fluctuation of 1-32 per cent in the rate amounts to 31<sup>1</sup>/<sub>2</sub> cents on \$1,000. Write figures as follows; giving preference to the first two forms:

*Fl.* 4395 <sup>20</sup>                      *Fl.* 67 <sup>25</sup>                      *G.* 395 <sup>20</sup>                      *Fl.* 395 <sup>25</sup>/<sub>100</sub>

# Dutch Money. Dollars and Cents to Florins (Guilders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

Money of the Netherlands, page 140. For figuring profits when exchange is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , etc., see page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows; it is better to use the word, Florins, than the word, Guilders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Guilders.)*

Dollars  
to  
Florins

$39\frac{7}{8}$

# Florins (Guilders) and Cents to Dollars and Cents. Dutch Money.

Money of Holland.

1 Guilder = 100 Cents.

For values of coins, see page 190. A fluctuation of 1-32 per cent in the rate amounts to 31 1/2 cents on \$1,000. Write figures as follows; giving preference to the first two forms:

*Fl. 4395 20*

*Fl. 67 25*

*G. 395 20*

<i>Fl.</i>	<i>395</i>	<i>25</i> <i>100</i>

# Dutch Money. Dollars and Cents to Florins (Guilders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

Money of the Netherlands, page 140. For figuring profits when exchange is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , etc., see page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows: it is better to use the word, Florins, than the word, Guilders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Guilders.)*

# Florins (Guilders) and Cents to Dollars and Cents. Dutch Money.

Money of Holland.

1 Guilder = 100 Cents.

For values of coins, see page 190. A fluctuation of 1-32 per cent in the rate amounts to 31 1/4 cents on \$1,000. Write figures as follows; giving preference to the first two forms:

*Fl. 4395 20*

*Fl. 67 25*

*G. 395 20*

# Dutch Money. Dollars and Cents to Florins (Guilders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

Money of the Netherlands, page 140. For figuring profits when exchange is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , etc., see page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows; it is better to use the word, Florins, than the word, Guilders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Guilders.)*

Dollars  
to  
Florins

Florins to Dollars

40.13

# Dutch Money. Dollars and Cents to Florins (Gulders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

Money of the Netherlands, page 140. For figuring profits when exchange is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , etc., see page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows; it is better to use the word, Florins, than the word, Gulders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Gulders.)*

Dollars  
to  
Florins

# Florins (Guilders) and Cents to Dollars and Cents. Dutch Money.

Money of Holland.

1 Guilder = 100 Cents.

For values of coins, see page 190. A fluctuation of .01 in the rate amounts to about 25 cents on \$1,000. Write figures as follows; giving preference to the first two forms:

*Fl. 4395<sup>20</sup>*

*Fl. 67<sup>25</sup>*

*G. 395<sup>20</sup>*

<i>Fl.</i>	395	<sup>25</sup> / <sub>100</sub>

# Dutch Money. Dollars and Cents to Florins (Gulders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

Money of the Netherlands, page 140. For figuring profits when exchange is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , etc., see page 4; when quoted by .01, .02 etc., see page 141. Write amounts as follows; it is better to use the word, Florins, than the word, Gulders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Gulders.)*

# Florins (Guilders) and Cents to Dollars and Cents. Dutch Money.

Money of Holland.

1 Guilder = 100 Cents.

For values of coins, see page 190. A fluctuation of .01 in the rate amounts to about 25 cents on \$1,000. Write figures as follows; giving preference to the first two forms:

*Fl. 4395<sup>20</sup>*
*Fl. 67<sup>25</sup>*
*G. 395<sup>20</sup>*

<i>Fl.</i>	<b>395</b>	<sup>25</sup> / <sub>100</sub>

# Dutch Money. Dollars and Cents to Florins (Guilders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

Money of the Netherlands, page 140. For figuring profits when exchange is quoted by  $\frac{1}{16}$ ,  $\frac{1}{8}$ , etc., see page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows; it is better to use the word, Florins, than the word, Guilders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $\frac{20}{100}$  Florins. (Or Guilders.)*

Dollars

# Florins (GUILDERS) and CENTS to DOLLARS and CENTS. Dutch Money.

Money of Holland.

1 Guilder = 100 Cents.

For values of coins, see page 190. A fluctuation of .01 in the rate amounts to about 25 cents on \$1,000. Write figures as follows; giving preference to the first two forms:

*Fl. 4395<sup>20</sup>*

*Fl. 67<sup>25</sup>*

*G. 395<sup>20</sup>*

<i>Fl.</i>	395	<sup>25</sup> / <sub>100</sub>

# Dutch Money. Dollars and Cents to Florins (Guilders) and Cents.

Money of the Netherlands.

1 Florin = 100 Cents.

Money of the Netherlands, page 140. For figuring profits when exchange is quoted by  $1/16$ ,  $1/8$ , etc., see page 4; when quoted by .01 .02 etc., see page 141. Write amounts as follows; it is better to use the word, Florins, than the word, Guilders; avoid odd cents:

*Two Thousand Three Hundred Ninety One and  $20/100$  Florins. (Or Guilders.)*

# Florins (Guilders) and Cents to Dollars and Cents. Dutch Money.

Money of Holland.

1 Guilder 100 Cents.

For values of coins, see page 190. A fluctuation of .01 in the rate amounts to about 25 cents on \$1,000. Write figures as follows; giving preference to the first two forms:

*Fl. 4395*<sup>20</sup>

*Fl. 67*<sup>25</sup>

*G. 395*<sup>20</sup>

## Money of Various Silver Using Countries.

164

THE following ten or twelve pages of tables will not be much used in city and country banks through the United States in general. They will be found most useful in converting United States money into British or Hongkong dollars, or Chinese dollars "local currency," or Mexican dollars which are quite extensively used in some parts of the Orient. The government of Mexico coins a silver trade dollar especially for export which is not a part of its own monetary system. There are some Central and South American countries using money of the values here given, see pages 190 and 191, but neither drafts for remittances to those countries, nor bills of exchange drawn against consignments of goods, or other credits, are often written in their currency. Exchange transactions are mostly written in pounds sterling or United States dollars. One of the principle reasons for this is that scarcely any of these countries have money of a stable value. Most of them are on either a silver or a depreciated paper basis. The commercial value of their money fluctuates widely and often rapidly. There is no telling a year ahead what any of it is going to be worth; while English and United States moneys are on a sound gold standard basis, and there is no question as to the permanency of their value. All banks of any importance located in these countries carry accounts either in some United States city or in London, and checks for remittances reach those banks as deposits, and bills are paid out of the funds.

This is true also, though not to the same extent perhaps, of exchange transactions with China and Japan. There is a growing tendency to make remittances to these countries in United States dollars, with checks or drafts on New York, or Pacific coast cities, which come back there for credit and payment. When this book of tables was compiled, China was in the midst of a rebellion against the Manchu dynasty, and its monetary system was in a mixed and chaotic condition, if indeed it could be said to have had a monetary system at all. It is not possible to foresee

the outcome of this struggle, or what effect it will have on the kind of money used in the country. It is to be hoped that a monetary unit will be established. As it is now, the Hong Kong, or British, and Mexican dollars pass current at some of the seaport cities. The Chinese dollar (the dollar "local currency," as it is called,) is largely used in some places. In some parts of the country, the circulating medium is pieces of Mexican dollars which in quantities pass according to weight; these are called "chopped dollars." But the money most used is the tael. The tael is not strictly a coin but a little "shoe," and they vary in weight and fineness according to the locality in which they are made. Their bullion value ranges all the way from 45 to 75 cents each. Their fineness is stamped upon them by an assayer in the employ of the local banks where they are made. In some parts of the country, they are larger than in some other parts. Those made in some localities are quite uniform in weight and fineness.

If one is called upon to write a draft in any of the moneys for which the following tables are available, and for which no specimen line is given, write it like the samples shown, mentioning the kind of money in which payment is to be made. With the figures, do not be too quick to use abbreviations; it is better to write, Pesos, than, P, or, Taels, or, Local Taels, than, T.

In most Central and South American countries, United States money circulates freely; in some it has a legal standing. English, French and German coins are used to some extent, and in some places are lawful money. The paper and silver money of these countries is seldom seen in the United States, especially at interior points, and there is little market for it, except for what bullion there is in the silver.

Neither is there so good a market for bills of exchange drawn on Central and South American points as there is for those drawn on European points, and no general rule for figuring their value can be so well given.

Rates  
41 to 50

## Profit Table for Rates from 44 to 47 Cents.

For explanation see page 141. Owing to the wide range in values between rates 41 and 50, this table will not prove accurate below 44 or above 47; it may be used, however, for rates as low as 43 or as high as 48, but results will be in error by about 5 or 6 per cent at those points. For high rates the figures are too large, for low rates too small. For rates below about 43, the table on page 141 should be used; for rates above about 48, the table on page 179 should be used.

# Mexican Money, Etc. Dollars and Cents to Pesos and Centavos, And Other Moneys.

Money of Mexico, some Central American, South American and Asiatic countries.

For figuring profits, see pages 141, 165 and 179. About countries using money of the values here given, see page 164. A fluctuation of .05 in the rate amounts to from about \$1.22 to about \$1.28 on \$1,000. Write amounts as follows:

*Three Hundred Ninety Five and <sup>20</sup>/<sub>100</sub> Pesos. Or, Dollars, Local Currency.*

# Pesos and Centavos, And Other Money, to Dollars and Cents. Mexican Money, Etc.

All countries using money of the value here given have decimal systems.

Exchange on most Central and South American countries is usually drawn in U. S. dollars or in English money. In the far East, drafts are commonly payable in the money of the country on which they are drawn. Write figures as follows:

*Pesos 345<sup>20</sup>*

*Loc. Cur. \$ 295<sup>20</sup>*

Loc. Cur.	395	<sup>25</sup> / <sub>100</sub>

# Pesos and Centavos, <sup>And Other</sup> Money, to Dollars and Cents. Mexican Money, Etc.

All countries using money of the value here given have decimal systems.

Exchange on most Central and South American countries is usually drawn in U. S. dollars or in English money. In the far East, drafts are commonly payable in the money of the country on which they are drawn. Write figures as follows:

*Pesos 345<sup>20</sup>*

*Loc. Cur. \$295<sup>20</sup>*

Loc. Cur.	395	<sup>25</sup> / <sub>100</sub>

# Pesos and Centavos, <sup>And Other</sup> ~~Moneys.~~ to Dollars and Cents. Mexican Money, Etc.

All countries using money of the value here given have decimal systems.

Exchange on most Central and South American countries is usually drawn in U. S. dollars or in English money. In the far East, drafts are commonly payable in the money of the country on which they are drawn. Write figures as follows:

*Pesos 345<sup>20</sup>*

*Loc. Cur. \$295<sup>20</sup>*

<i>Loc. Cur.</i>	<b>395</b>	<b><sup>25</sup>/<sub>100</sub></b>

# Pesos and Centavos, <sup>And Other</sup> Money, to Dollars and Cents. Mexican Money, Etc.

All countries using money of the value here given have decimal systems.

Exchange on most Central and South American countries is usually drawn in U. S. dollars or in English money. In the far East, drafts are commonly payable in the money of the country on which they are drawn. Write figures as follows:

*Pesos 345<sup>20</sup>*

*Loc. Cur. \$295<sup>20</sup>*

Loc. Cur.	395	25 100

# Mexican Money, Etc. Dollars and Cents to Pesos and Centavos, And Other Moneys.

Money of Mexico, some Central American, South American and Asiatic countries.

For figuring profits, see pages 141, 165 and 179. About countries using money of the values here given, see page 164. A fluctuation of .05 in the rate amounts to from about \$1.01 to about \$1.05 on \$100. Write amounts as follows:

*Three Hundred Ninety Five and <sup>20</sup>/<sub>100</sub> Pesos. Or, Dollars, Local Currency.*

**Pesos and Centavos, <sup>And Other</sup> Money, to Dollars and Cents. Mexican Money, Etc.**

All countries using money of the value here given have decimal systems.

Exchange on most Central and South American cities is usually drawn in U. S. dollars or in English money. In the far East, drafts are commonly payable in the money of the country on which they are drawn. Write figures as follows:

Loc. Cur.	395	$\frac{25}{100}$

# Yen and Pesos and Centavos, Etc. to Dollars and Cents. Money of Japan, Mexico, Etc.

1 Yen = 100 Sen. 1 Peso (Mexican Dollar) = 100 Centavos.

Exchange on most Central and South American countries is usually drawn in U. S. dollars or in English money. In the far East, drafts are commonly payable in the money of the country on which they are drawn. Write figures as follows:

Y. 125 <sup>25</sup>/<sub>100</sub>

Pesos 345 <sup>20</sup>/<sub>100</sub>

Loc. Cur. \$ 295 <sup>20</sup>/<sub>100</sub>

Loc. Cur.	395	<sup>25</sup> / <sub>100</sub>

## Money of Russia, Japan, Mexico, Etc.

178

THERE are several countries using money the exchange value of which ranges from a little below 50 cents to about 52. The principal ones, and those for which the eight pages following will be most used, are Russia, Japan, the Philippine Islands, China and Mexico. They all have decimal systems and to convert United States money into that of any of them, divide by the rate; to convert their money into ours, multiply by the rate.

Of the countries mentioned, Russian exchange is the most important. The monetary unit is the rouble, or ruble. The minting or par value of the gold rouble is  $51\frac{1}{2}$  cents. Gold is coined 900 parts fine in denominations of 5,  $7\frac{1}{2}$ , 10 and 15 roubles; the 15 rouble piece is the Imperial, and the  $7\frac{1}{2}$  rouble piece is the Half Imperial. Paper money is much used but there are some excellent forgeries in circulation. The silver rouble, the 50 kopeck and the 25 kopeck pieces are 900 parts fine; smaller denominations are 500 parts fine.

Japan is a gold standard country and its monetary unit is the yen which is worth, in United States money, 49.8 cents. Gold is coined 900 parts fine in 5, 10 and 20 yen pieces. Silver is coined 800 parts fine in 10, 20 and 50 sen pieces. Paper money is issued in various denominations by the Bank of Japan. Japan's currency system will compare favorably with that of any other nation, and its banking facilities are good; but New York and Chicago foreign exchange jobbers ordinarily do not furnish a list of banks in the country upon which drafts may be drawn, as they do for cities throughout Europe. Banks in the United States, especially those at interior points, desiring to issue drafts on Japanese banks, must make special arrangements for the privilege. This is not only true of Japan but of China and other oriental countries, and of Central and South America as well. Partial lists are sometimes furnished. The banking business, in this particular, is improving from year to year, however, and with the opening of the Panama canal, it is to be presumed that our foreign exchange

relations with these countries will grow.

Mexico is a gold standard country; its gold peso is worth 49.8 cents, and is 900 parts fine; its silver peso is 902.7 parts fine; lesser denominations are 800 parts fine. Mexico coins a silver trade dollar, the "Mexican dollar," especially for export; it is not a part of the general circulation, since the coinage act of 1904, but it is the same weight and fineness as its "peso;" it is used largely in some parts of the orient, and in some Central and South American countries.

The Philippine Islands exchange with the United States is growing in importance as our trade with the country increases. Drafts should be written in "Philippine Pesos," or in United States dollars, preferably the former. The silver peso and its subdivisions in centavos are 900 parts fine and are coined at the United States mint, and are of the high grade for which the United States coins are noted. The peso weighs 416 grains as against the  $412\frac{1}{2}$  grain silver dollar with which we are familiar. It appears to be the same size but it is a trifle heavier and is worth just half as much. 100 Philippine centavos, or cents, make 1 peso.

For Chinese money see page 164. There are some remarks on that page also about Japanese and South American moneys.

Prior to the year 1868, there was minted in Spain a coin called the "doubloon; its name was due to the fact that it was twice, or double, the value of the pistole. It weighed about 129 grains, was 900 parts fine, and was worth about \$5.00. Central and South American countries, being Spanish in their origin, had, many of them, a coin called by the same name, a doubloon. The published data in regard to these coins is meager; they were not all of the same value; but they have been altogether supplanted by the currencies adopted in recent years. There is so little gold used in these countries at the present time that practically none of it reaches the United States, especially interior points. The Mexican doubloon was worth about \$15.50, that of Chilli about \$3.65.

## Profit Table for Russian and Japanese Moneys.

For explanation see some of the profit tables for other countries, for instance page 141. This table is intended for rates as low as 47 or 48 on page 174, but owing to the wide range in value there will be an error of about 5 or 6 per cent at that point; the figures will be too small by that amount. For some of the high rates on page 189, the figures will be too large up to about 1 per cent, that is, if the profit shown in the table is \$5.00, the error may amount to about 5 cents.

# Russian Money, Etc. Dollars and Cents to Roubles and Kopecks, And Other Money.

Money of Russia, Japan, Mexico, and some other American and Asiatic countries.

For figuring profits, see page 179. For Russian, Japanese, and other monies, see pages 178 and 164. In exchange transactions with some of these countries, drafts are often written in United States dollars or in English money. Write amounts as follows:

*Six Hundred Twenty Five and  $\frac{20}{100}$  Roubles. Or, Yen. Or, Pesos.*

Dollars  
to  
Roubles

# Roubles and Kopecks, <sup>And Other Money,</sup> to Dollars and Cents. Russian Money, Etc.

All countries using money of the value here given have decimal systems.

Value of coins, page 190. A fluctuation of .01 in the rate amounts to about 19 cents on \$1,000. Write figures as follows; give preference to first form; avoid odd kopecks, and other units of small denominations:

*R.* 625 <sup>25</sup> *R.* 345 <sup>10</sup> *Y.* 395 <sup>20</sup> See forms on page 177.

# Russian Money, Etc. Dollars and Cents to Roubles and Kopecks, And Other Monies.

Money of Russia, Japan, Mexico, and some other American and Asiatic countries.

For figuring profits, see page 179. For Russian, Japanese, and other monies, see pages 178 and 164. In exchange transactions with some of these countries, drafts are often written in United States dollars or in English money. Write amounts as follows:

*Six Hundred Twenty Five and <sup>20</sup>/<sub>100</sub> Roubles. Or, Yen. Or, Pesos.*

Dollars  
to  
Roubles

# Roubles and Kopecks, And Other Moneys, to Dollars and Cents. Russian Money, Etc.

All countries using money of the value here given have decimal systems.

Value of coins, page 190. A fluctuation of .01 in the rate amounts to about 19 cents on \$1,000. Write figures as follows; give preference to first form; avoid odd kopecks, and other units of small denominations:

*R.* 625<sup>25</sup>    *R.* 345<sup>10</sup>    *Y.* 395<sup>20</sup>    See forms on page 177.

<i>R.</i>	625	<sup>25</sup> 100

# Roubles and Kopecks, <sup>And Other Money,</sup> to Dollars and Cents. Russian Money, Etc.

All countries using money of the value here given have decimal systems.

Value of coins, page 190. A fluctuation of .01 in the rate amounts to about 19 cents on \$1,000. Write figures as follows; give preference to first form; avoid odd kopecks, and other units of small denominations:

*R.* 625<sup>25</sup>    *R.* 345<sup>10</sup>    *Y.* 395<sup>20</sup>    See forms on page 177.

<i>R.</i>	625	<sup>25</sup> 100

# Roubles and Kopecks, <sup>And Other</sup> Money, to Dollars and Cents. Russian Money, Etc.

All countries using money of the value here given have decimal systems.

Value of coins, page 190. A fluctuation here, .01 in the rate amounts to about 19 cents on \$1,000. Write figures as follows; give preference to first form; avoid odd kopecks, and other units of small denominations:

*R<sup>o</sup> 625 <sup>25</sup>* *R. 345 <sup>10</sup>* *Y. 395 <sup>20</sup>* See forms on page 177.

# Roubles and Kopecks, <sup>And Other</sup> ~~Moneys,~~ to Dollars and Cents. Russian Money, Etc.

All countries using money of the value here given have decimal systems.

Value of coins, page 190. A fluctuation of .01 in the rate amounts to about 19 cents on \$1,000. Write figures as follows; give preference to first form; avoid odd kopecks, and other units of small denominations:

*R.* 625 <sup>25</sup> *R.* 345 <sup>10</sup> *Y.* 395 <sup>20</sup> See forms on page 177.

## Value of the Gold Coins of the Principal Countries of the World.

The gold dollar of the United States contains 23.22 grains of pure gold, but the dollar piece is not now coined. This makes one grain of pure gold worth 43.066 cents. To find the value of a gold coin, multiply its gross weight in troy grains by its fineness, pointing off three places which is equivalent to dividing by one thousand, or deduct one tenth or one twelfth, as the case may be, and multiply the result by 43. (The decimal .066 may ordinarily be disregarded for the error will amount to only 3 cents on a coin the weight of a twenty dollar gold piece.) As gold is the money standard of the world, the coins in the following table will remain at the value given as long as the countries named continue to mint them of the same weight and fineness as when the table was compiled. The Director of the United States mint issues a circular quarterly, in form much like this table, which may be had upon application. Some of the following countries use little or no gold money.

COUNTRY.	Unit.	Fine.	Value.	Remarks.
United States.	Dollar.	9 10	1.00	The one dollar piece not coined.
Great Britain and Colonies.	Pound.	11 12	4.867	Pound and ½ pound (sovereign and ½ sovereign).
Canada.	Dollar.	.....	1.00	Gold not coined; English gold is legal tender.
Newfoundland.	Dollar.	.....	1.014	English gold is legal tender.
Egypt.	Pound.	875	4.943	100 piasters = 1 pound; English gold is legal tender.
India.	Rupee.	.....	.324	Gold not coined; English gold is legal tender.
Straits Settlements	Dollar.	.....	.568	Gold not coined; English gold is legal tender.
France.	Franc.	9 10	.193	} Members of the Latin Union.
Belgium.	Franc.	9 10	.193	
Switzerland.	Franc.	9 10	.193	
Italy.	Lira.	9 10	.193	
Greece.	Drachma.	9 10	.193	
Spain.	Peseta.	9 10	.193	Same as the Latin Union.
Bulgaria.	Lev.	9 10	.193	Same as the Latin Union.
Roumania.	Lei.	9 10	.193	Same as the Latin Union.
Servia.	Dinar.	9 10	.193	Same as the Latin Union.
Finland.	Mark.	9 10	.193	Same as the Latin Union.
Norway.	Krone.	9 10	.268	Norway, Sweden and Denmark have the same currency.
Sweden.	Krone.	9 10	.268	
Denmark.	Krone.	9 10	.268	10 marks = 1 crown.
Germany.	Reichsmark.	9 10	.238	
Netherlands.	Florin.	9 10	.402	Monetary unit, florin or guilder.
Austria-Hungary.	Krone.	9 10	.203	1 ducat equals \$2.287.
Russia.	Rouble.	9 10	.515	15 roubles = 1 Imperial.
Portugal.	Milreis.	11 12	1.080	10 milreis = 1 crown.
Turkey.	Pound.	11 12	4.396	100 piasters = 1 pound.
Persia.	Toman.	9 10	1.704	10 krans = 1 toman.
Siam.	Tical.	9 10	.371	
China.	.....	.....	.....	Gold not used.
Japan.	Yen.	9 10	.498	
Philippine Islands.	Peso.	.....	.50	Gold not coined; United States gold is used.
Argentina.	Peso.	9 10	.965	5 pesos = 1 Argentine.
Brazil.	Milreis.	11 12	.546	
Bolivia.	Boliviano.	.....	.389	12½ bolivianos = 1 pound sterling.
Chili.	Peso.	11 12	.365	Escudo, 5 pesos; doubloon, 10 p.; condor, 20 p.
Costa Rica.	Colon.	9 10	.465	U. S., English, French and German gold is used.
Columbia.	Dollar.	9 10	1.00	10 dollars = 1 condor.
Equador.	Sucre.	9 10	.487	10 sueres = 1 pound sterling.
Haiti.	Gourde.	9 10	.965	
Mexico.	Peso.	9 10	.498	Coins a silver trade dollar for export.
Panama.	Balboa.	9 10	1.00	
Paraguay.	Peso.	9 10	.965	Uses currency of the Argentine Republic.
Peru.	Libra.	11 12	4.867	10 sols = 1 libra.
San Domingo.	Dollar.	.....	1.00	
Uruguay.	Peso.	.....	1.034	
Venezuela.	Bolivar.	9 10	.193	Money same as France.

## Value of the Silver Coins of the Principal Countries of the World.

There is no fixed value, in United States gold dollars, for the silver coins of any country in the world, except where the credit of the country issuing them is on a sufficiently secure gold basis to ensure their being redeemed in gold at the option of the holder; and any published statement, or table, showing the value of such silver coins, cannot be otherwise than inaccurate because the price of silver fluctuates in the market.

It is doubtful if there is any book or table in print showing the value of the moneys of the world, that is as much as ten years old, that is a reliable guide today to the man who is not well informed on that particular subject. The best and in fact the only guide to the value of a silver coin is either to know the financial standing of the country whose stamp it bears or to weigh it and multiply the weight of its pure silver contents by the market price of silver bullion. Any druggist can tell the gross weight of a coin in grains. Below is a list of the principal countries of the world showing the fineness of their silver coinage. To find how much silver there is in a coin, multiply the gross weight by the fineness, of course pointing off three places which is equivalent to dividing by one thousand. The market price of silver is published in the daily papers and in banking and financial magazines. The nominal value may be ascertained by referring to the table for gold coins on the opposite page, it being based on the gold value.

 Value  
of  
Coins

For want of space, the following abbreviations are necessary: *M.* for multiples, and *S.* for subdivisions.

United States,	Dollar and S.	900	Portugal,	Milreis and S.	916½

Italy,	Lira,		Chili,	Peso and S.	835
Greece,	Drachma	1 5 units.	Costa Rica,	Colon,	.....
Spain,	Peseta,	1 1 u. and S.	Columbia,	Dollar,	900
Bulgaria,	Lev,			2 decimo and S	835
Roumania,	Lei,		Ecuador,	Sucre and S.	900
Servia,	Dinar,		Guatemala,		
Finland,	Mark and M.	868	Honduras,	Peso and S.	900
	50 and 25 penni.	750	Nicaragua,		
Norway,	1 and 2 krona.	800	Salvador,		
Sweden,	50, 40 and 25 ore	600	Haiti,	Gourde,	900
Denmark,	10 ore,	400	Mexico,		902 7
Germany,	Mark and M and S.	900		Less than peso	800
Netherlands,	Guilder, ½ and M	945	Panama,	Peso and S.	900
	¼ guilder and S.	640	Paraguay,	Peso,	
Austria-Hungary,	2 and 5 krona.	900	Pern,	Sol and S	900
	1 krona and S	835	San Domingo,	Dollar,	
Russia,	Rouble and ½ and ¼.	900	Uruguay,	Peso,	
	20 copecks and S	500	Venezuela,	5 bolivars,	900
				2 bolivars and S	835

**Example.**— How much is the silver in a United States silver dollar worth when bar silver is quoted at 56 cents an ounce? A silver dollar weighs 412½ grains; deduct one tenth and we have 371¼ grams of pure silver; a troy ounce contains 480 grains; therefore the silver in a silver dollar is worth 371¼ ÷ 480 this of 56 cents, which is 43.3+ cents.

**Example.**— How much is the silver in a United States half dollar worth when bar silver is quoted at 56 cents an ounce? A silver half dollar weighs 192 9 grains; deduct one tenth and we have 173.61 grains of pure silver; therefore the silver in a half dollar is worth 173.61 ÷ 480 this of 56 cents, which is about 20½ cents.

The value of any silver coin may be determined in the same manner. An English crown (5 shillings) weighs 436.36 grains and is 925 parts fine.  $436.36 \times .925 = 403.63$ ,  $403.63 \div 56 = 7.21$  cents. Its nominal value is \$1.217.

## Interest on \$4.85, (and \$4.87), Being the Value of 1 Pound.

Computed on the basis of 365 days to the year.

The interest figures in the first part of each column are computed on \$4.85. For all ordinary purposes, the others may be disregarded; but where it is desired to figure on \$4.87, the two figures following the hyphen may be substituted for the last two figures of the number preceding it, being careful only where the third figure back is increased by 1.

## Interest on 95 cents, (and 95½), Being the Value of 4 Marks.

Computed on the basis of 360 days to the year.

The interest figures in the first part of each column are computed on 95 cents. For all ordinary purposes, the others may be disregarded; but where it is desired to figure on 95½ cents, the two figures following the hyphen may be substituted for the last two figures of the number preceding it, being careful only where the third figure back is increased by 1.

## INDEX.

English Money Tables, for rates from \$4.75 to \$5.00 per pound.	Pages 8 to 15
French Money Tables, for rates from fcs. 5.10 to fcs. 5.30 $\frac{3}{4}$ per dollar.	48 to 67
German Money Tables, for rates from 92 cts. to 98 cts. per 4 marks.	68 to 93
Dutch Money Tables, for all rates from 39 $\frac{3}{4}$ cts. to 40 $\frac{3}{4}$ cts. per florin.	112 to 163
All Other Tables are in Numerical Order, for rates from 11 cts. to 52 $\frac{1}{2}$ cts. per foreign monetary unit, and may be found as quickly from the value of the exchange by the marginal index as by the page numbers.	
Profit Tables are at the beginning of each section, into which the book is naturally divided for the different countries, together with some other information about figuring exchange, writing drafts, value of money, etc. The proper page number for these tables is also given at the head of every page.	
African countries, drafts on.	47
Asiatic countries, drafts on.	47
Argentine Republic. No tables.	190, 164
Austria-Hungary, money of, etc.	106
Profit Table.	107
Conversion tables.	108-121
Belgium, same as France and Spain.	
Brazil. No tables.	47, 190
Bolivia. No tables.	190
Bulgaria, same as France and Spain.	
Central American countries.	164, 178
Ceylon.	47
China, money of.	164
Conversion tables, up to 52 $\frac{1}{2}$ cts.	166-189
Chili. No tables.	190, 164
Costa Rica. No tables.	190, 164
Columbia. No tables.	190, 164
Crossed sterling check, or draft.	5
Denmark, see Scandinavia.	
Ecuador. No tables.	190, 164
Egypt.	46
Finland, same as France and Spain.	
France, money of, etc.	100
Profit Table, rates 19 and 20.	101
Conversion tables.	
Rates 5.10 to 5.30 $\frac{3}{4}$ .	48-67
Rates 19-20. (Gold basis.)	102-105
Rates 11-19. (Silver basis.)	94-99
Germany, money of, etc.	122
Profit Table.	123
Conversion tables.	
Rates 92 to 98.	68-93
Rates 23 to 25.	124-127
Greece, same as France and Spain.	
Holland, money of, etc.	110
Profit Table.	141
Conversion tables.	142-163
Identification of foreign payee.	5, 128
Interest tables.	192-195
India and Burmah.	46
Italy, same as France and Spain.	
Japan, money of, etc.	178
Profit Table.	179
Conversion tables.	180-189
Mexico, money of, etc.	178
Profit Table.	179, 165
Conversion tables.	166-189
Netherlands, see Holland.	
Norway, see Scandinavia.	
Panama. No tables.	190
Peru. No tables.	190, 164
Philippine Islands, money of.	178
Profit Table.	179
Conversion tables.	180-189
Portugal.	47
Remittances by foreign Post.	128
Roumania, same as France and Spain.	
Russia, money of, etc.	178
Profit Table.	179
Conversion tables.	180-189
Scandinavia, money of, etc.	128
Profit Table.	129
Conversion tables.	130-139
Servia, same as France and Spain.	
South American countries.	164, 178
Spain, money of, etc.	100
Conversion tables.	
Rates 11-19. (Silver basis.)	94-99
Rates 19-20. (Gold basis.)	102-106
Sweden, see Scandinavia.	
Switzerland, same as France and Spain.	
Turkey.	16
Value of coins.	190-191
Venezuela same as France and Spain.	

## INTEREST TABLES.

The Davis Tables have the interest figured at the following rates.

3, 3½, 4, 4½, 5, 5½, 6, 6½, 7, 7½, 8, 9, 10 and 12 per cent.

The type is the same as in this book of Foreign Exchange Tables; there is a line for each rate, and carried out in the same manner, an imaginary decimal point under an imaginary decimal point for different multiples of the same number.

The interest on any given amount at a certain rate per cent and for a certain number of days usually corresponds with the interest at some other rate and for some other number of days. For instance, the interest at 6 per cent for 60 days, at 5 per cent for 72 days, at 4 per cent for 90 days, at 3 per cent for 120 days, and at several other rates for other numbers of days, all give the same result. Advantage has been taken of this fact in these tables and it was found possible to reduce the number of pages in the book very materially from the number of pages other interest books contain to get the same sum total of results. The consequence was a great saving in the composition and the cost of publication and the opportunity to offer the best interest table for the money yet produced. Other interest tables do not contain all the rates this book contains, except those set in small type, and which are quite expensive. And those tables, for ordinary purposes, are not more useful than these. They are computed on the basis of 360 days to the year with supplementary tables for quickly reducing the result to a 365 day basis if desired.

If you are in need of an interest table, be sure and get a descriptive circular and sample page of these; you will not want any other.

*Price per single copy, Postpaid.* . . . . . \$1.50

---

## DATE TABLES.

Showing the number of days from any date to any other date within one year, with supplementary tables for figuring Interest and Return Premiums.

The principal feature to this book is the cut indexes at the side. First is an index for the months from which dates are reckoned. On opening the book to one of these months, a second index much like the first is revealed. These two indexes enable one to pick up the book and turn almost instantly to any two dates in the year and the number of days intervening is given in the margin. Then there are 30, 60 and 90 day tables, and quickly accessible, as well as tables showing the number of days from any date in any month to the corresponding date in any other month.

The book is set in the same type as the Foreign Exchange and the Interest Tables.

*Price per single copy, Postpaid.* . . . . . \$2.50

---

## GRAIN TABLES.

TABLES FOR WHEAT AND OTHER GRAIN, *Price \$1.25*

Showing the value of any amount of grain, by steps of 10 lbs., from 15 cts. to \$1.50 per bus.

POUNDS TO BUSHELS TABLES, . . . . . *Price 50 cts.*

Reducing pounds to bushels at 32, 33, 34, 35, 48, 49, 56, 57, 60, 68, 70, 72, 75 and 80 pounds.
